

# Technology Deployments

## Collaborative Engagement

For over 20 years Source One has specialized in Information Technology Deployments. We establish deep relationships with you through a collaborative engagement philosophy. Source One leadership promotes a collaborative culture that is founded on the tenets of enabling people to be successful in their lives and careers.

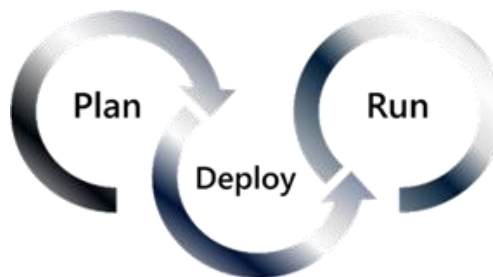

## Project Management

Our management systems are designed to provide you services, tailored to your unique needs, by notifying, recording and reporting on all project phases. Delivering metrics that matter; our engagements are project managed by a single point of contact utilizing our Pro-Manage - Information Technology Services Management platform.
