

Information Technology Surveys

S1 360 Critical Health Check - Infrastructure and Component Performance Audit and Survey

Source One has designed a comprehensive technology audit that captures all the component details, current performance and physical state of all your Point of Sale and Integrated IT assets.

By measuring the condition of assets you are informed to make better decisions on maintenance plans so performance is optimized, risks are mitigated, failures are reduced and system reliability is extended.

“What gets measured gets managed”

Peter Drucker

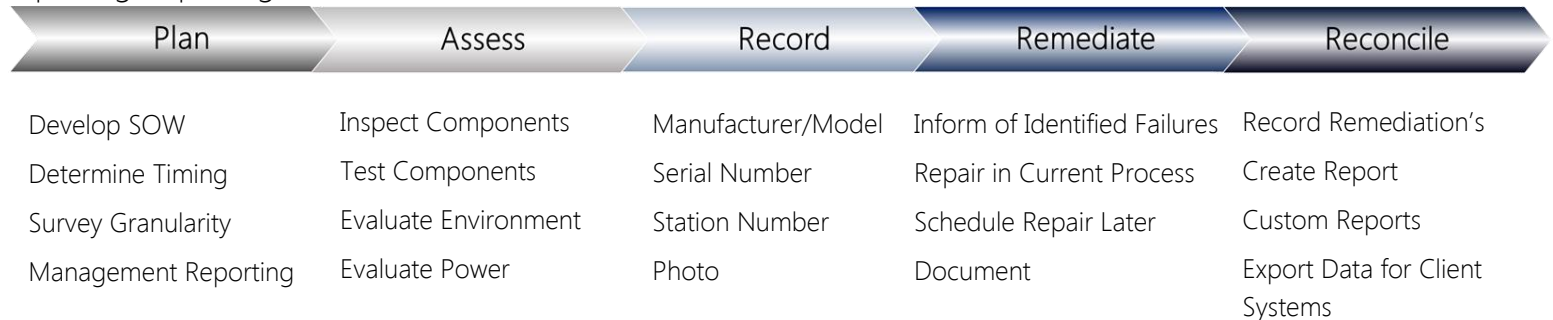

Maintaining an accurate accounting of operational assets is a difficult record keeping task for most organizations. More often than not, accurate record keeping has been an out of scope function or totally ignored as part of the maintenance regiment.

Source One Health Check and Technology Survey's Provides you with:

- Enterprise Wide IT Survey
- Component Health Evaluation
- Component Model, Serial Number, Manufacturer Data
- Station by Station Condition Evaluation
- Exportable Data Records
- Infrastructure Testing
- Full Data Recording and Reporting
- Photo Documentation
- Recommended Repair and Remediation Identification
- Full Report

Survey Process

Each survey engagement is custom designed to assure accurate and comprehensive data collection. Survey's are coordinated by a designated project manager. Results are recorded and archived in Pro-Manage – ITSM for reporting, exporting and future use.
